

Markdown-to-PDF Slides for Developers

Julien Sellier

Introduction

Prez allows you to define simple slides in Markdown
and export them as PDF.

Document Structure

Prez documents must begin with a metadata header,
for example:

```
---
```

```
title: Markdown-to-PDF Slides for Developers
```

```
author: Julien Sellier
```

```
lang: en
```

```
--
```

Which is then followed by pages.

Pages

Pages are separated by triple-hyphens ("---").
Each page is made up of consecutive blocks.

Blocks

The following block types are supported:

- H1 ("#")
- Text (default)
- Image ("")
- Code ("```")
- List ("-")

Image blocks

*This is just
an example.*
